

ELECTRIFICATION SERVICES

ABB Navigate: Getting started

Deep analyses of the system condition

Energy Consumption Assessment

High level assessment for insights into current energy consumption

Submetering Installation

Granular energy consumption assessment

Networking Modelling (SLD)

Update of obsolete single line diagram

Electrical System Health Check

Non-intrusive site assessment to identify gaps

ABB Navigate

Let ABB Navigate be your North
Star on the journey to better
reliability, safety & security and
energy & carbon performance for
electrical assets.

Net Zero Strategy

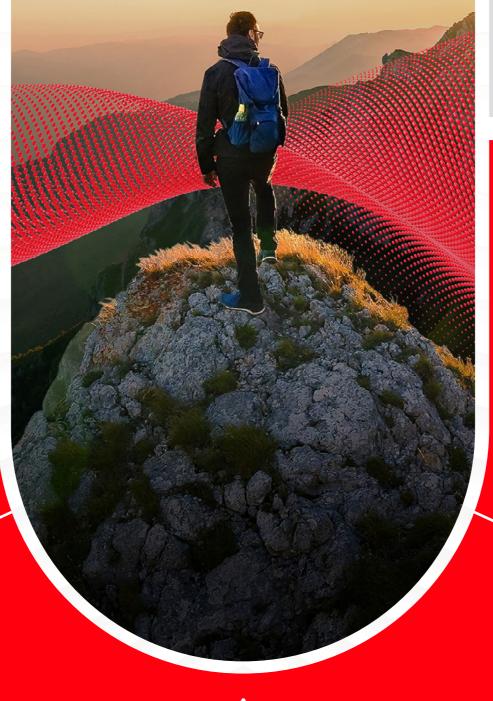

Decarbonization and energy efficiency roadmap

BESS-as-a-Service

Turnkey solution with performance guarantees, without upfront investment

Safety & Security
