

## Kindera Recliner

Care starts with connection. Kindera embodies our drive to promote seamless, engaged care. Patients can feel at ease during their treatment and recovery, while providers can flow through their work naturally.

The Trans4rm™ system allows either arm of the recliner to retract into the frame, creating a smooth platform for safe patient transfers.

Adjustment controls are intuitively located for easy access by providers so they can remain focused on the patient while giving care.

Options for heat and power along with design variations to accommodate different body types, help enhance patient comfort during infusion therapy and long-term care settings.
