Pre Fall 25

CERTIFICATIONS

The qualities we use varies season by season, but we do have some staples in each collection, such as viscose, cottons, chiffons, linen and fine wool.

We pursue to produce in the most sustainable way possible, and prefer using materials that we know, that we have long experience with, that are certified sustainable and of long-lasting and durable qualities.

100% GOTS ————— COTTON

100% FCS ————— VISCOSE

100% RWS ————— WOOL

GOTS

This is the highest certificate for cotton qualities. The materials are not only organically made, but the certificate also includes working conditions.

- The fabric is environmental friendly, as the farmers only use soil without chemical pesticides and the water consumption is minimized.
- No dangerous chemicals are used when the cotton is spun into yarn and made into fabric.
- Worker's health is protected thanks to a non-chemical process.

FSC

FSC-certified forests are controlled according to strict standards. FSC guarantees that forest management does not lead to deforestation. People and animals living in these areas do not lose their land, and make sure that those who work there are taken care of.

RWS/RAS

Responsible Wool/Alpaca is a voluntary certification ensuring our wool comes from certified farms, prioritizing animal welfare and sustainable land use. It guarantees a healthy, humane life for sheep and promotes environmental care on farms.

TENCEL

Tencel, made from wood cellulose, is highly efficient and eco-friendly, using less water and energy than viscose or cotton. It's 100% biodegradable, durable, breathable, and soft, offering a cool, dry feel. In our Denim line, Tencel is blended with cotton for a softer, more feminine look.

RECYCLED POLYESTER

Recycled polyester is most often made from old PET bottles. It requires way less water, chemicals and energy to produce than regular polyester.
