## Italy

Only 1 in 3 Italian corporates ran Gen AI startup collaborations - second lowest in Europe

Italian corporates risk falling behind in the AI revolution, with only 37% having run startup collaborations on Generative AI in the last two years — the second lowest rate in Europe, according to Sopra Steria Next's Open Innovation Report 2025.

Despite 83% recognising Open Innovation as crucial to their strategy and 76% having dedicated collaboration departments — the highest in Europe — this lack of progress on collaborations is surprising.

However, a total of 74% of Italian corporates that have engaged in AI collaborations believe startups will play a crucial role in realising their AI strategy.

The appetite for collaboration seems to be growing, with 67% of Italian corporates that have not previously engaged in Open Innovation collaborations planning to do so in the next two years.

of Italian corporates judge Open Innovation strategically important – second highest in Europe

With other countries accelerating their AI partnerships, Italian corporates must act decisively to close the gap – or risk missing out on the next wave of innovation.
